Architecture - Retail / Shopping Mall (Hong Kong)

## MSL MALL

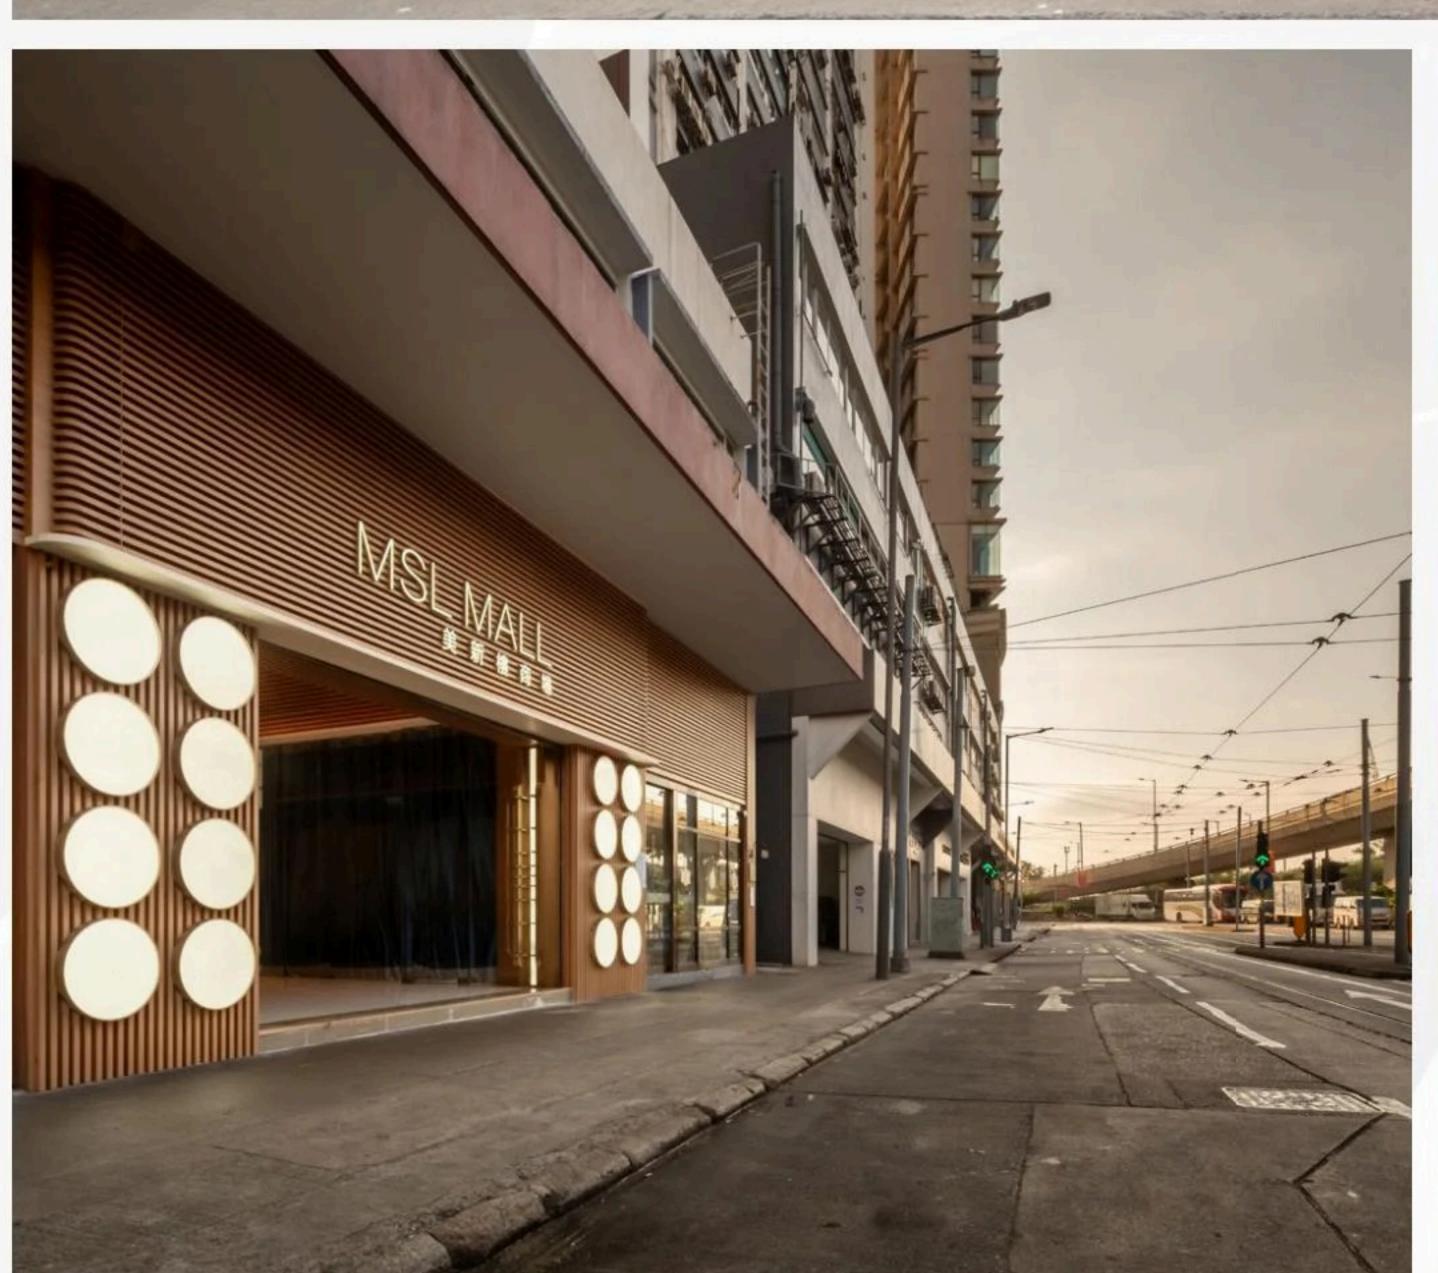

Inspired by villages in rural Asia, the renovation of the MSL Mall in one of the oldest areas of Hong Kong, namely Shek Tong Tsui in the Western District, presented a major design challenge. Many older, and smaller, shopping malls, the first generation of their kind in the urban fabric of a bygone era in Hong Kong, are going through a series of huge transformations, some swankier than others, but the important question to ask is: "Who is the mall built for?" The client wished for Alexander Wong Architects to reinvent the old Hong Kong-style neighbourhood mall (the first generation 'Arcade') and renew it for the 21st Century with the utmost respect towards local residents and the international neighbourhood surrounding the mall.

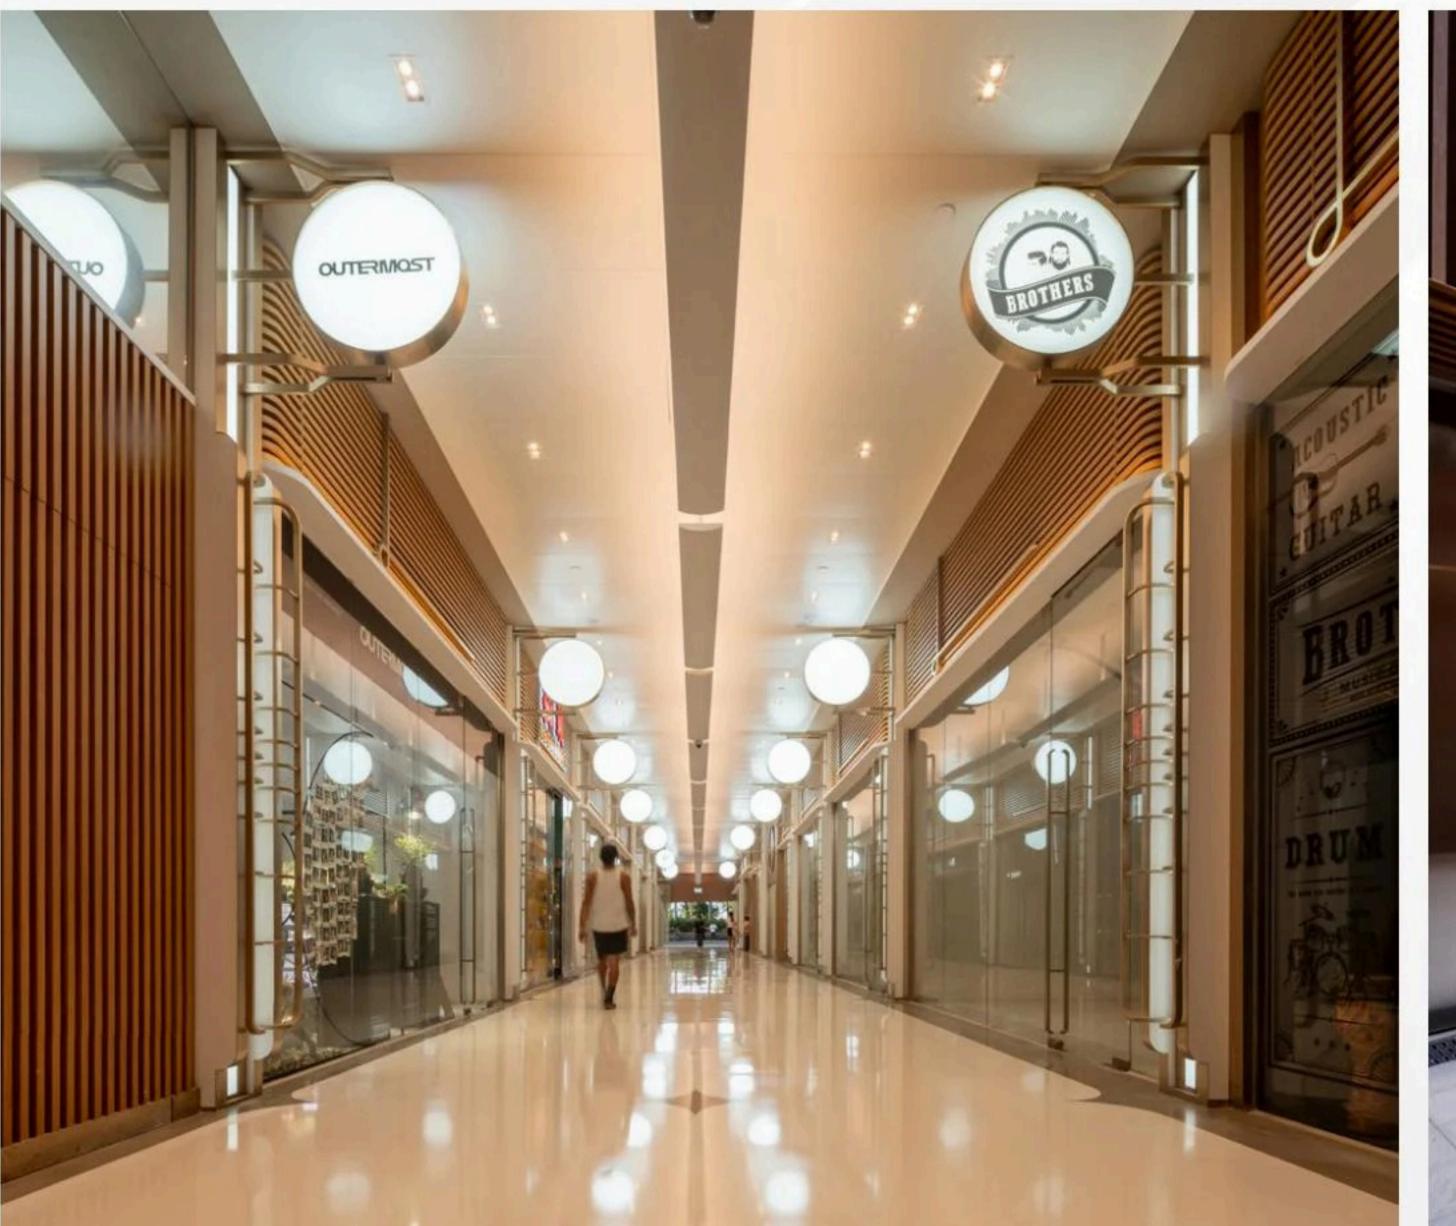

Applicant: Alexander Wong Architects | Location: Sai Wan, Hong Kong | Completion Date: August 2023 | Architect: Alexander Wong | Interior Designer: Alexander Wong / Andy Cheung / Ming Tan / Chet Xin | Total GFA (square metres): Approx. 1,240 | Net Leasable Area (square metres): Approx. 1,080
